- How to break down problems and present them in free Joomla forums
- Take a break. You've earned it!

Hints

Keep yourself on track

Print this checklist and keep it near where you study!

Check off your progress as you internalize each Joomla administration skill.

Delete and Repeat

If you have trouble recalling how to do something later, use the **Delete and Repeat** learning method.

When learning a new administrative task, delete what you've learned in training and start over. Repeating what you've done will help you internalize a technique.
